Ooh!Media + Quick Trigger / AlphaNET

Ethernet (wifi option)

Files can only be uploaded via a USB stick when using the Ooh!Media software

2 GB Ooh!Media / 80 messages with AlphaNET

Included

Wall and ceiling mounting brackets included

The Alpha W Series full color displays are perfectly readable in full sunlight. The super bright LED modules with a light intensity of 5500 nits produce striking messages that attract attention.

The Alpha W Series has a fine resolution and a high light intensity that attracts attention when the LED display is hung behind a window. In warehouses and shops with skylights or large windows, the high light intensity also produces a striking result. The Alpha W Series displays can also be used as an advertising medium to guide shopping customers to a specific aisle and promote certain products there.

If the W series LED display is not connected to the network, you can update the texts and images via a USB memory stick. This is extremely convenient.
